NOTICE

The following is designated as the Basic Report for this installation:

25X1

NPIC.

[REDACTED], An-ning Chemical Plant, China, June 1966 (TOP SECRET

BASIC DESCRIPTION

25X1D

Since [REDACTED] the date of the latest photography used in the referenced report, there has been some additional construction at An-ning Chemical Plant Yun-nan. Four unidentified production/support buildings, one with a stack, have been built in the northeast construction area. Newly constructed support/storage buildings have been seen in the southeast construction area and in the service and support area. The small scale and poor quality of the photography preclude determining the function of these buildings.

25X1D

25X1D

The plant was probably in operation on all photographic missions from [REDACTED] [REDACTED]. A light-toned material--possibly residual bleaching powder, caustic soda, or sodium chloride--was observed on the ground near the production facilities. Ample coal was seen in open storage at the steam plant and the caustic soda evaporation building.

The cutoff date for information in this report is [REDACTED]
